

**Kushla Water System
Engineer's Report
William G. Luker/Speaks & Associates**

3/26/2018

Mobile County Pay-As-You-Go Projects:

MCR 2010-109 Evans Road: The project construction is complete. As-Built drawings and closeout documents are being coordinated with the County.

Engineering Work:

The following work items are ongoing:

1. We are evaluating a request by the Operator to assess the feasibility of relocating the pump station on Kali Oka Road, which is not being used, to a point near the interconnection with South Alabama Utilities on Spice Pond Road. A representative from Morrow Water Technologies is supposed to be contacting Daryl Taylor to evaluate the station. It is my understanding that there will be no charge for that work.
2. Review the work and provide an Updated Water System Overview and Valve Reference Map: The final proposal was approved at the June 2017 Board meeting; work is underway. **No change since last report.**
